### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

- 6) ☐ Other: \_\_\_\_\_.

### **DETAILED ACTION**

The after Final response filed 7/8/04 has been considered in preparing this Office action.

1. Applicant's request for reconsideration of the finality of the rejection of the last Office action is persuasive and, therefore, the finality of that action is withdrawn.

### ***Claim Rejections - 35 USC § 103***

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-27 are rejected under 35 U.S.C. 103(a) as being unpatentable over Applicant's admitted Prior Art, figure 1 of the drawings and the respective areas of the specification (hereinafter "Prior Art") in view of Rao et al (WO 97/06523 hereinafter "Rao").

Prior Art teaches an imaging device for simultaneous image capture and image display updating (Fig. 1) comprising an imager (20) for capturing image data upon aiming the imager at an image; a CPU (30) that is in communication with the imager and issues commands to capture image data; a DMA module in communication with the imager and the CPU that executes the commands to capture image data; a memory module (60) in communication with the CPU and the DMA module includes a buffer (70). However, Prior Art fails to explicitly teach or suggest the memory module includes

two buffers and functions as doubled buffering while one is writing from CPU and the other buffer is refreshing (reading) the screen. This is what Rao teaches (Fig. 1, buffers 110 and 111 and page 15, first full paragraph). It would have been obvious to one of ordinary skill in the art at the time the present invention was made to combine the teachings of Rao into the system of Prior Art in order to obtain the advantages as taught by Rao (pages 6-9). Therefore, at least claims 1-27 would have been obvious.

### ***Response to Arguments***

4. Applicant's arguments with respect to claims 1-27 have been considered but are moot in view of the new ground(s) of rejection.

### ***Conclusion***

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kee M Tung whose telephone number is 703-305-9660. The examiner can normally be reached on Tuesday - Friday from 5:30 am - 4:00 pm.
